Solar Installations**

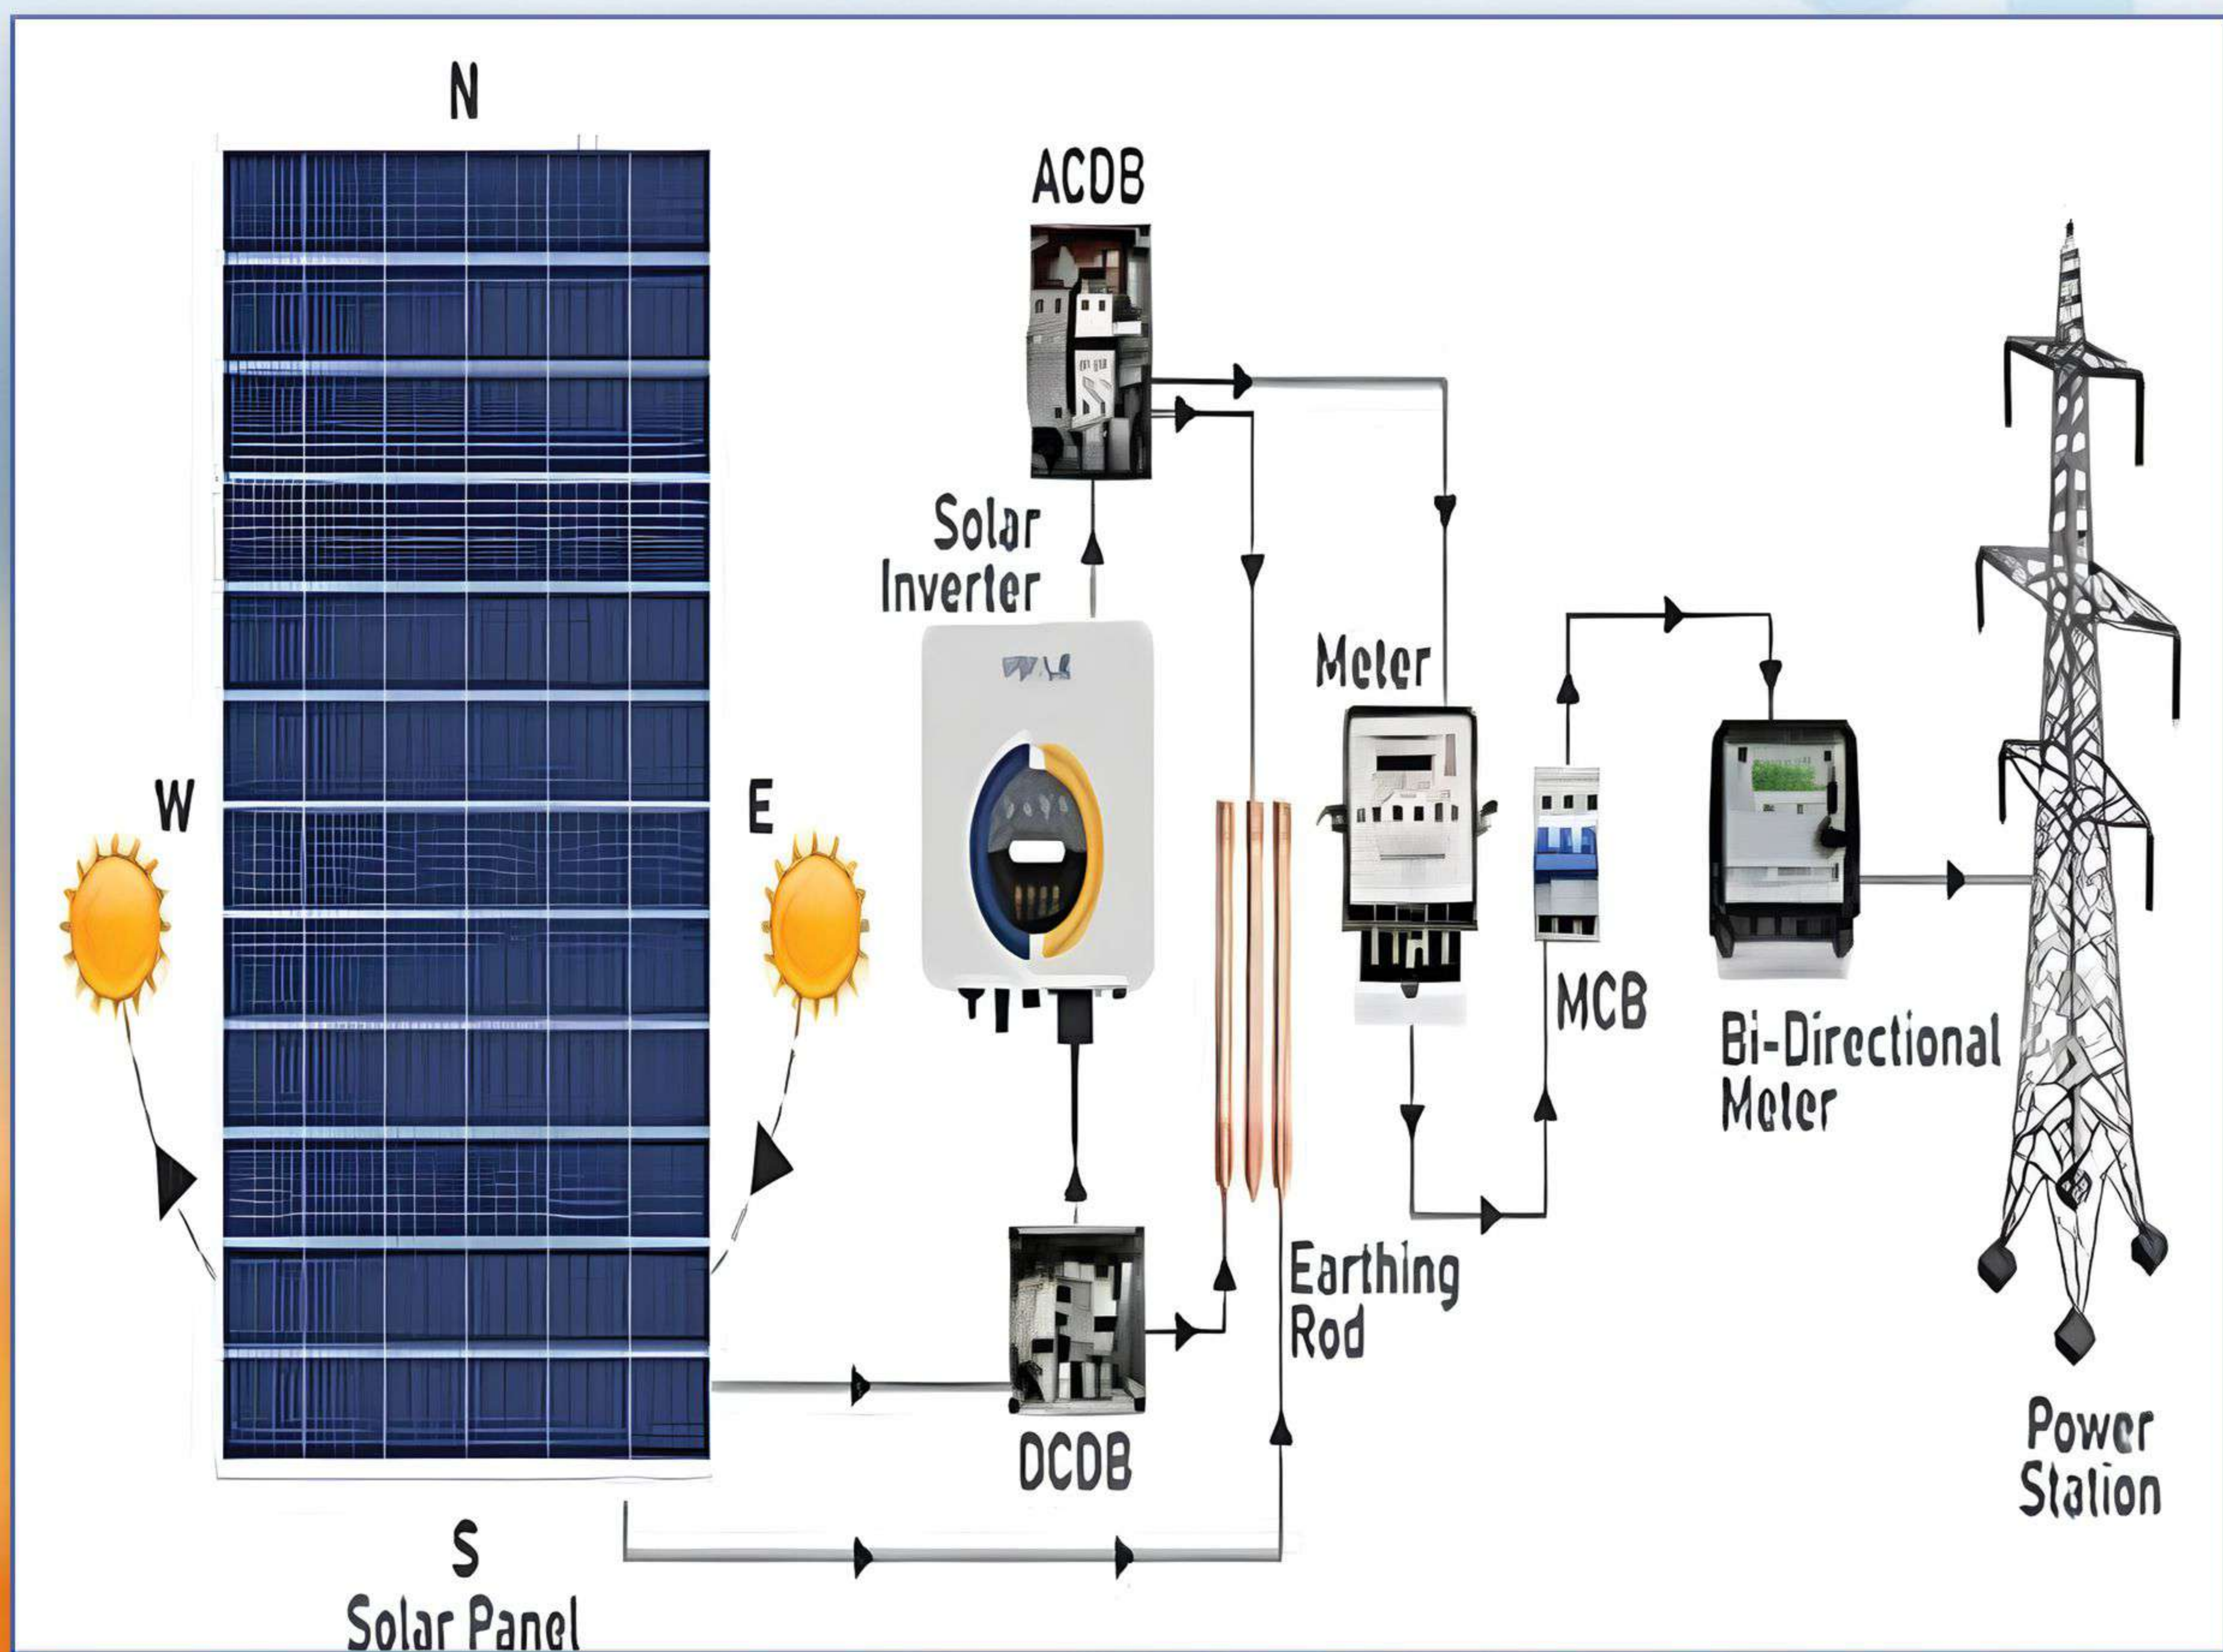

USING SOLAR ENERGY

LOWER EMISSIONS

**EVERY DAY WE REDUCE 5 TONS OF CO₂
FOR A HEALTHY ENVIRONMENT**

Turning Sunlight into Reliable Electricity

Our Most Inspiring Customer in Our Solar Journey

Gurralla Nagamani, a single woman residing at Yeluru Village, Parthipadu Mandalam, has an average monthly electricity consumption of around 140 units. Initially, when she voluntarily approached us for the installation of a 1 kW solar plant, we informed her that based on her current power consumption, a solar plant was not technically required.

However, she strongly expressed her interest in installing the solar plant, stating that her intention was to contribute towards reducing CO₂ emissions, saving trees, and also to utilize the government subsidy.

Considering her voluntary request and environmental commitment, we proceeded with the installation of a 1 kW solar plant, which has now been successfully completed and is operational as of today.

ABOUT US

OUR SERVICE

Nabhas Solar is an innovative renewable energy company dedicated to delivering sustainable solar solutions that empower communities, businesses, and industries to transition toward clean energy.

Our Mission

To accelerate the adoption of renewable energy by offering affordable, high quality solar systems that reduce carbon footprints and promote energy independence.

Our Values

Sustainability: Every project is designed to minimize environmental impact.

Innovation: We integrate cutting-edge solar technologies for maximum performance.

Trust: Long-term partnerships built on transparency and reliability.

Community Impact: Empowering local communities with clean energy access

Solar begins with reduce CO2 and Save the Money

What we Do

Residential Solar: Rooftop installations that help households cut electricity costs and embrace clean energy.

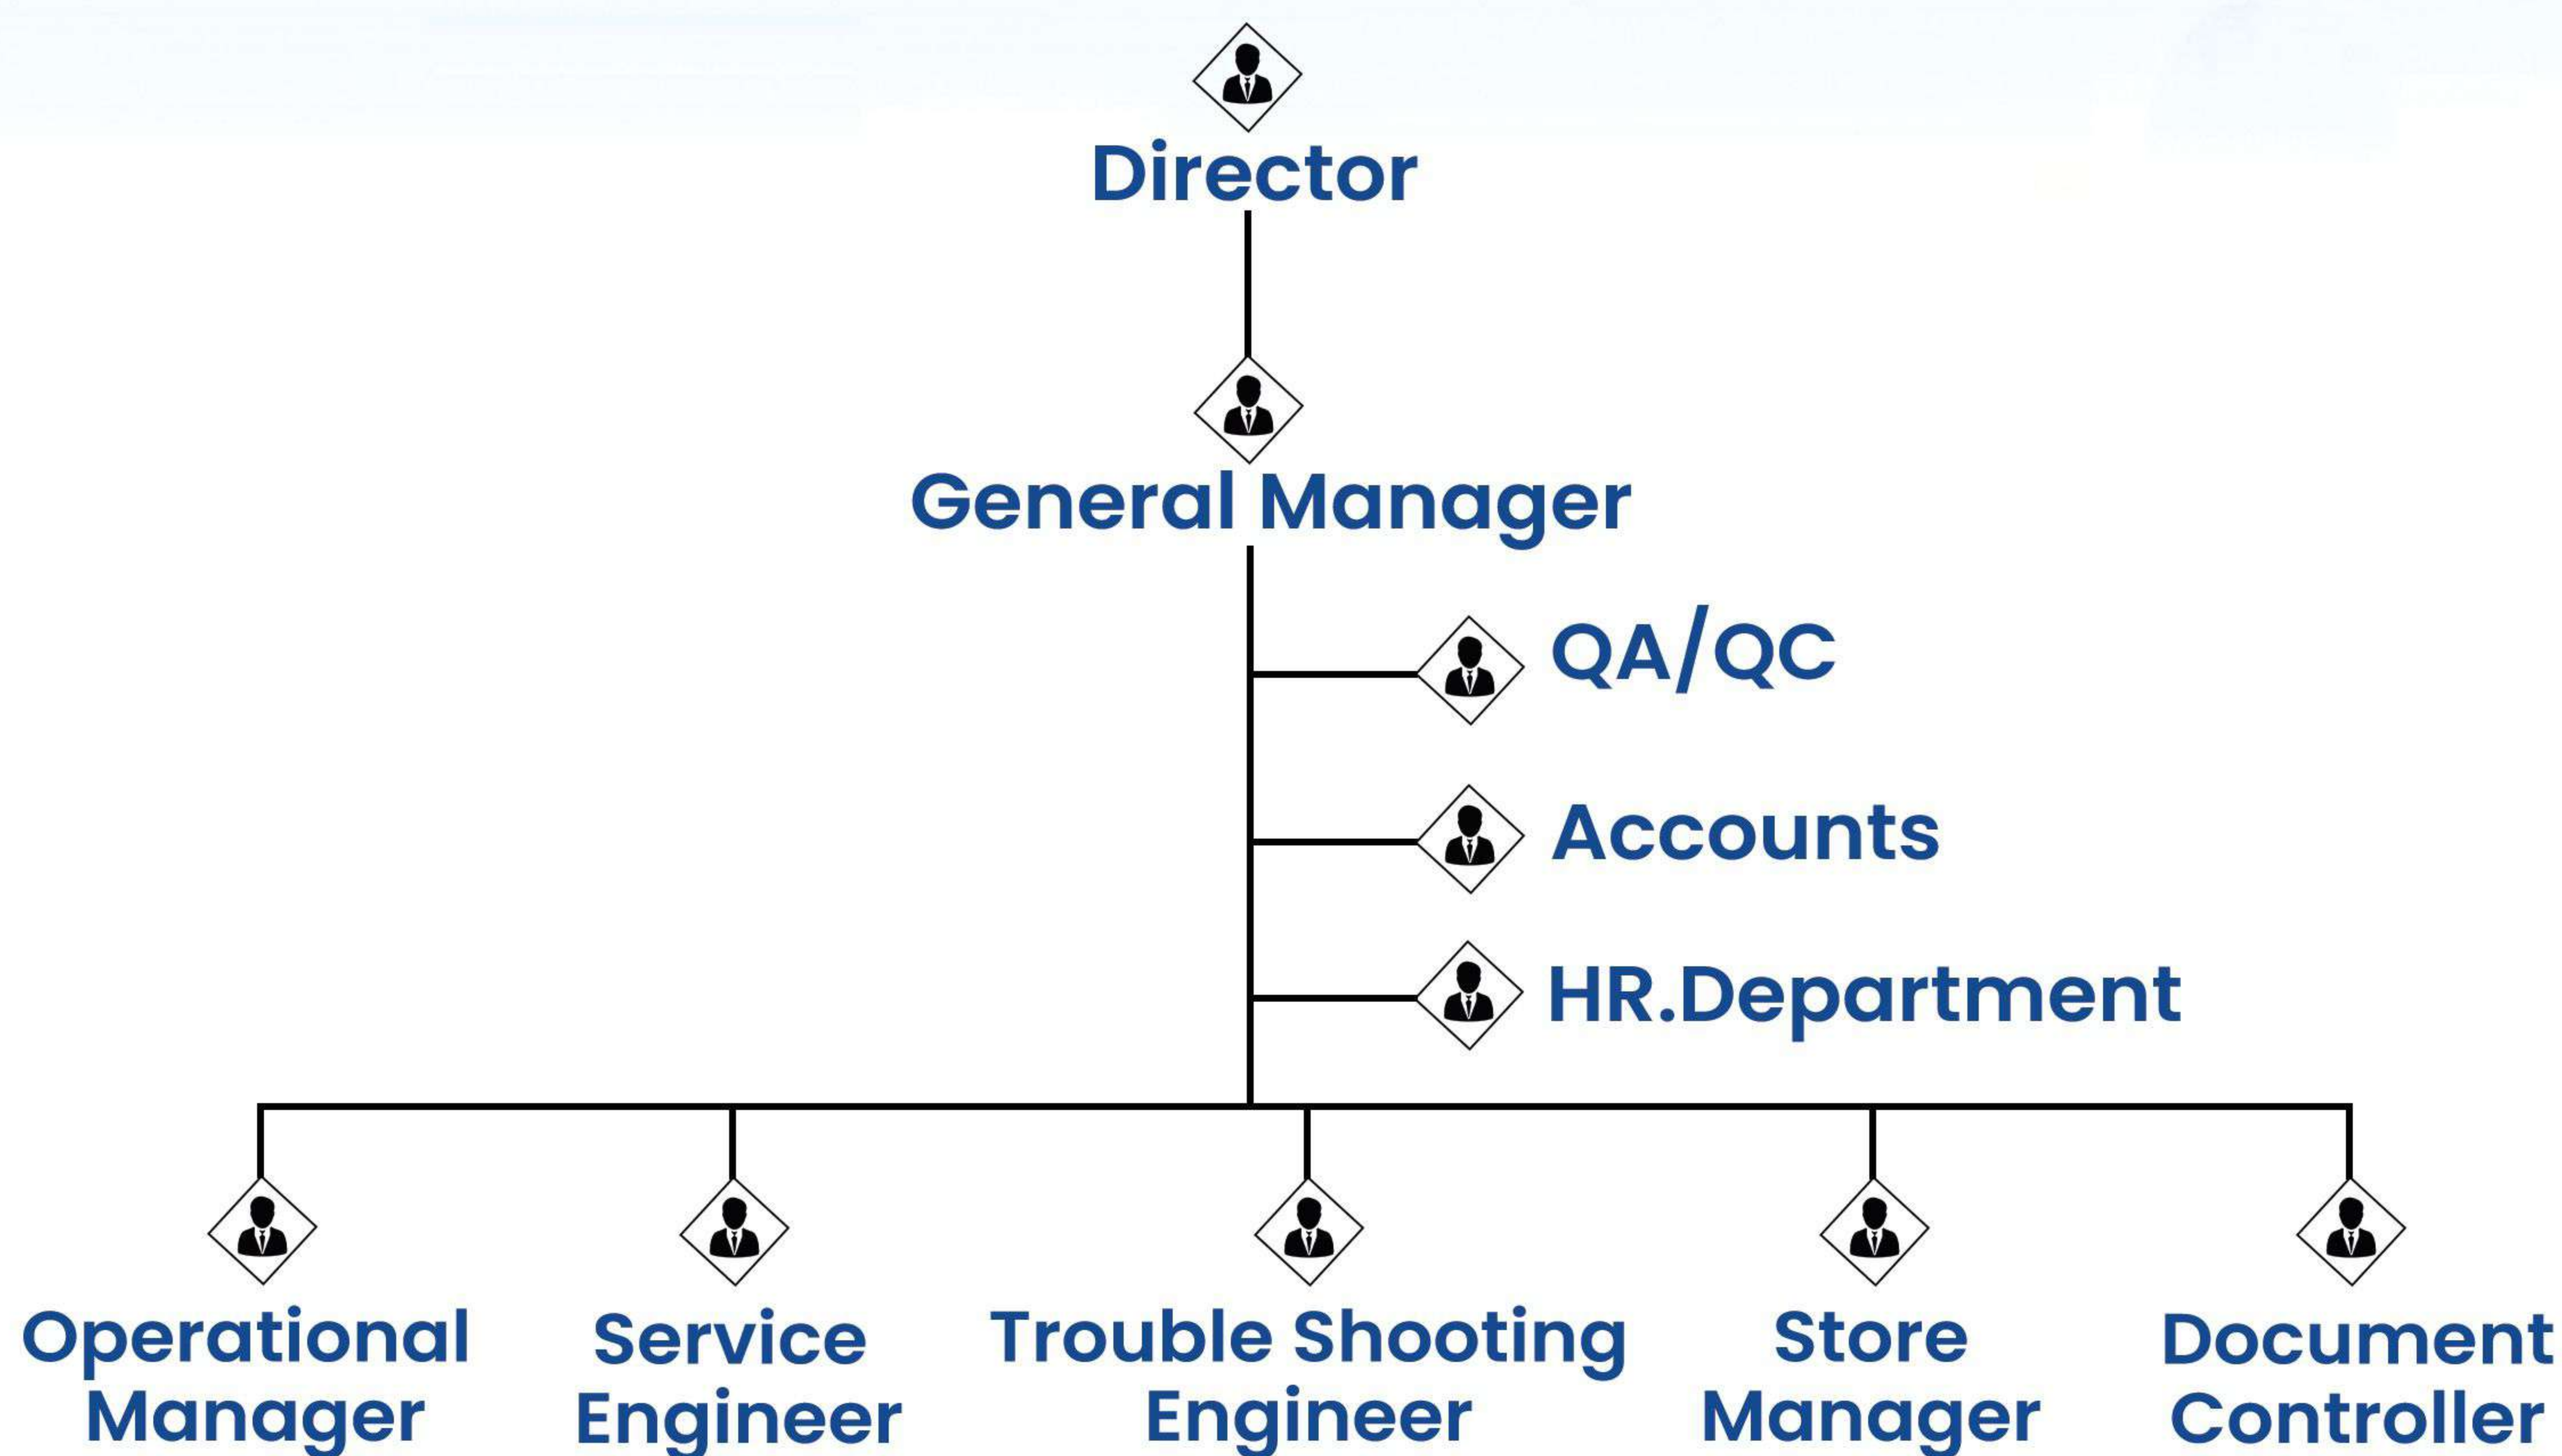

Commercial & Industrial Solar: Customized solar plants designed to optimize energy usage for businesses.

Engineering, Procurement & Construction (EPC): End-to-end project management, from design to commissioning.

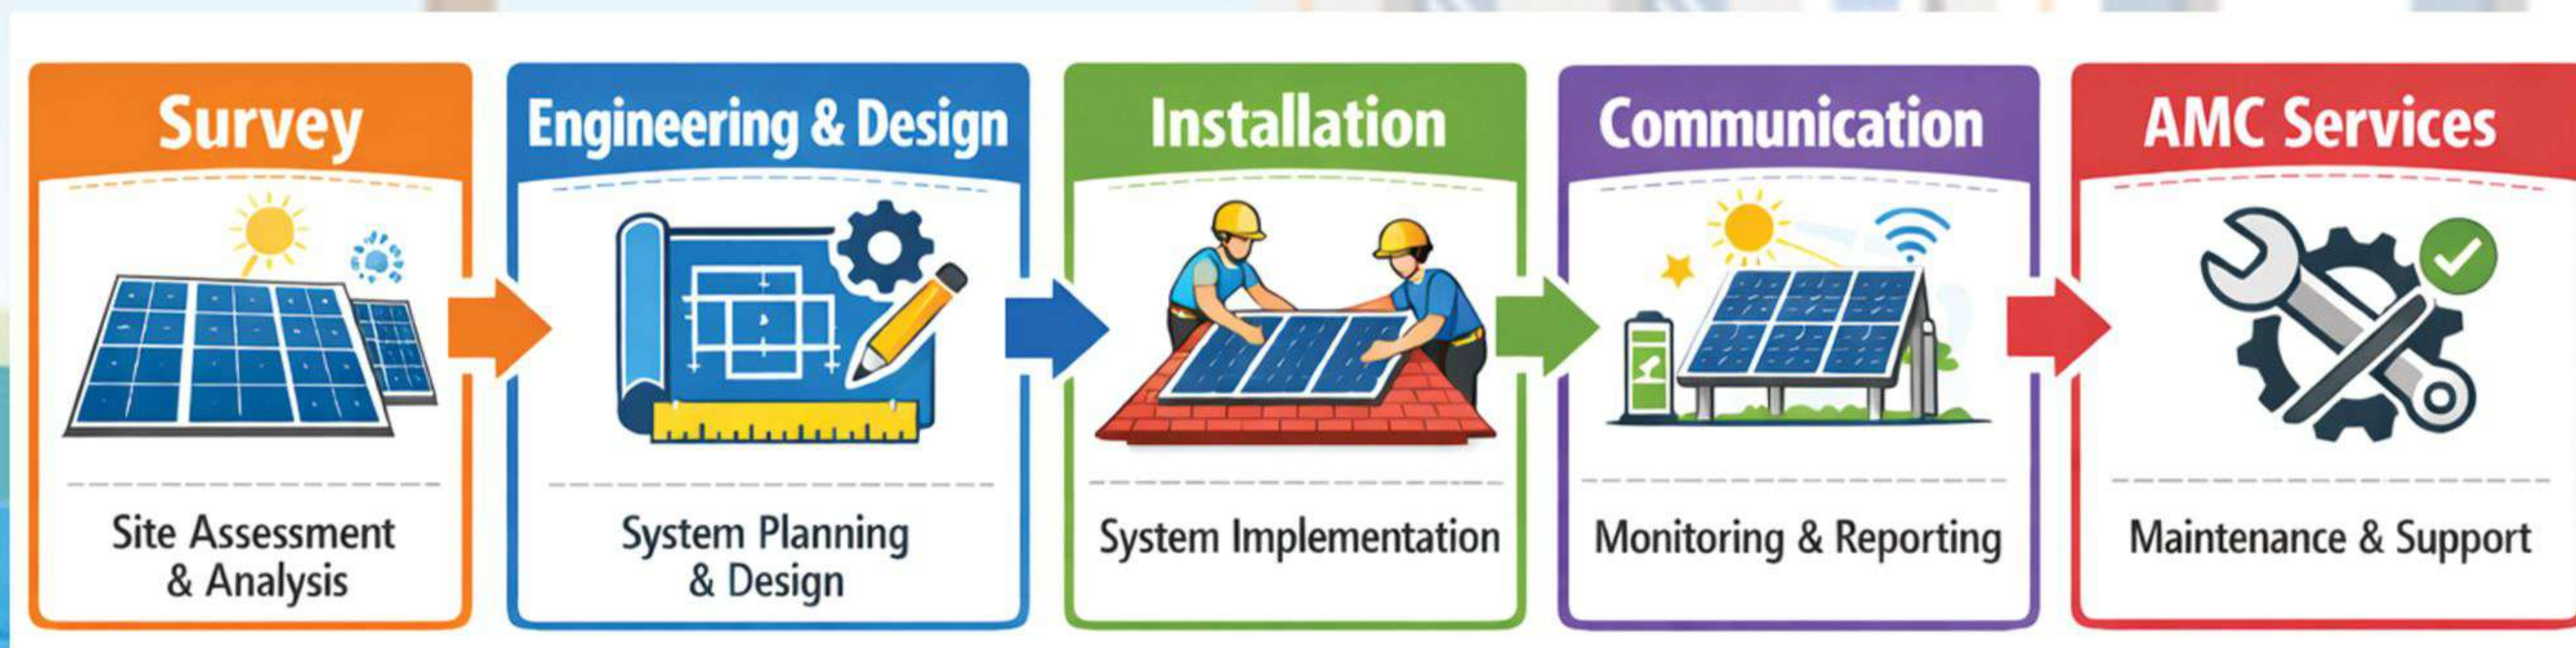

Sustainable Innovation: Leveraging advanced technology to maximize efficiency and durability of solar panels.

Our Strength in Solar:

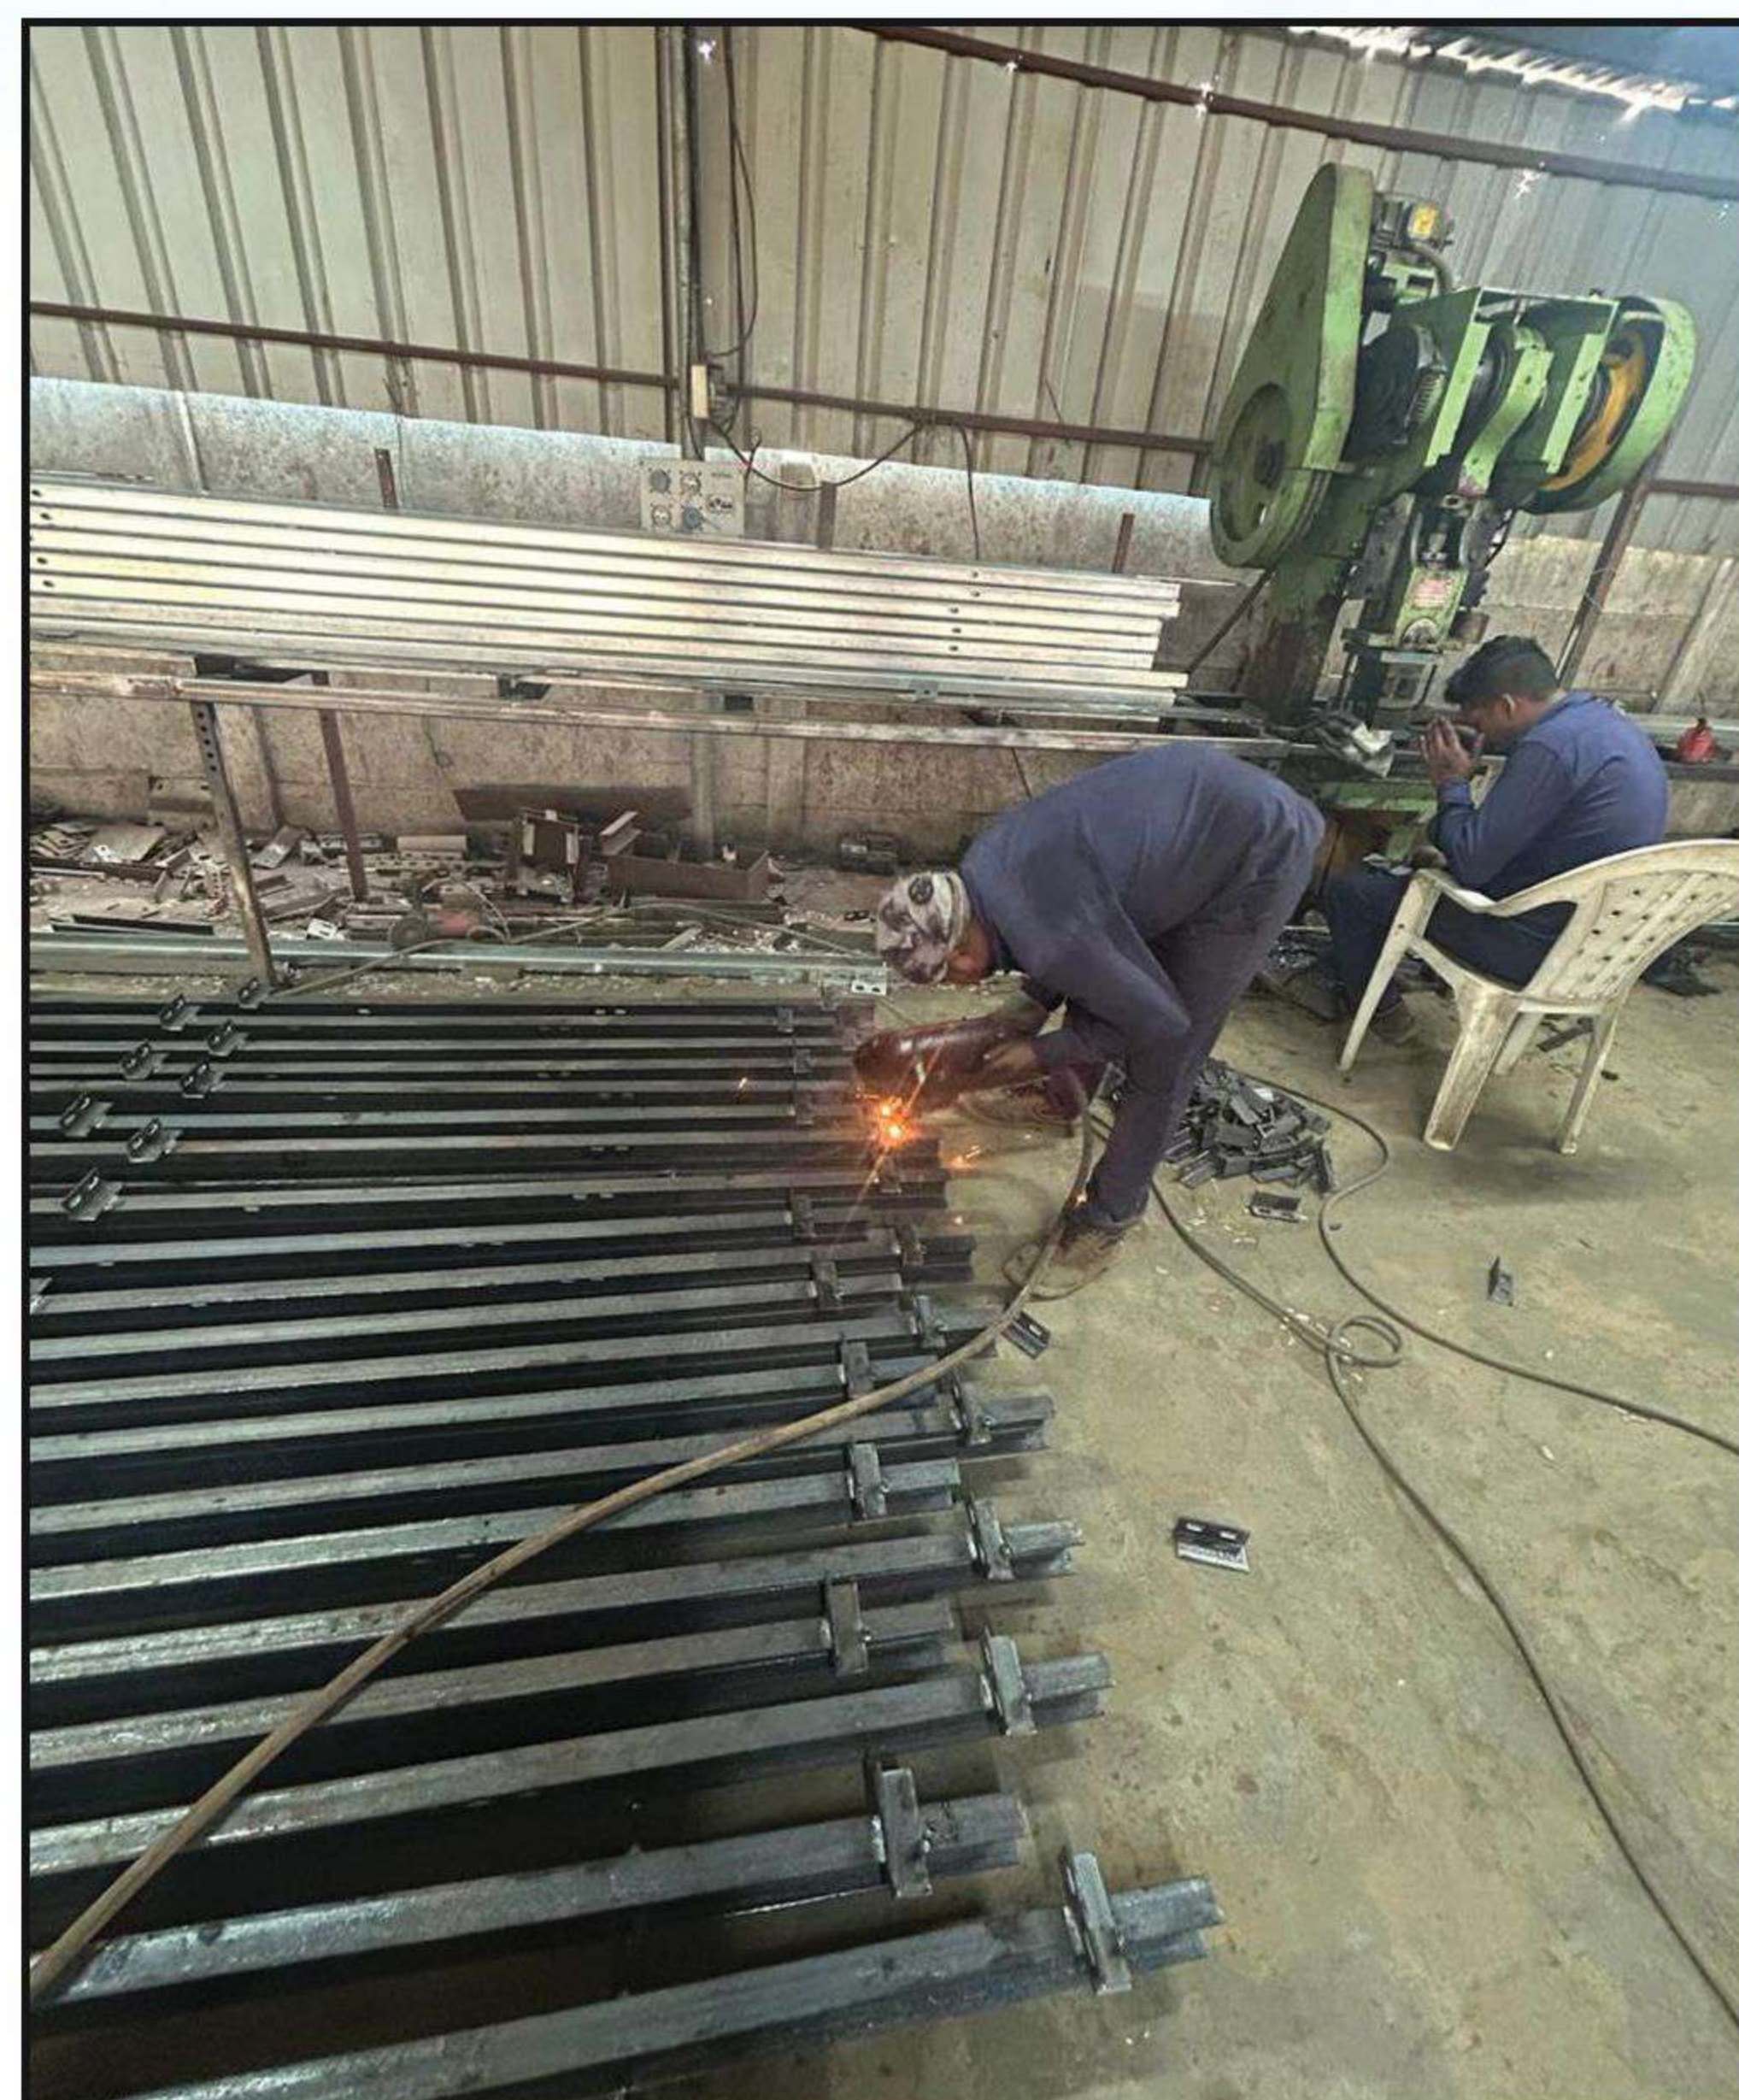

1. Inhouse Design for Panel Positions

2. Structure Design@200 Km/Hr

Quality Inspection of Structural Steel (Hot-dip Galvanized):

Solar Inverter with Track APP

ACDB Boxes:

ACDB- Single Phase 1kW to 6 kW

ACDB- Single Phase 1kW to 6 kW

GI-Structure bolt / SS bolts

100% Hot Di Galvavinzed Bolt / SS Bolts from Ludiana

Stainless Steel Fasteners for Solar Projects

Reliable & Corrosion-Resistant Fasteners for Solar Installations

SIZE RANGE	GRADES	STANDARDS
• Metric: M6 to M36 • Length: 16 mm to 300 mm • Custom sizes available for solar mounting structures	• SS 202 • SS 304 • SS 316	• Hex Bolts: DIN 933 • Hex Nuts: DIN 934 • Plain Washers: DIN 125 • Spring Washers: DIN 127

QUALITY HIGHLIGHTS

- Excellent corrosion resistance
- Long service life in outdoor environments
- Precision threading & consistent quality

APPLICATIONS

- Solar Module Mounting Structures
- Rooftop & Ground-Mounted Solar Projects
- Solar Frames, Clamps & Supports

Product Range

MS & High Tensile Bolts, Nuts & Washers

Standards

IS • DIN • ASTM • BS (As per requirement)

Grades

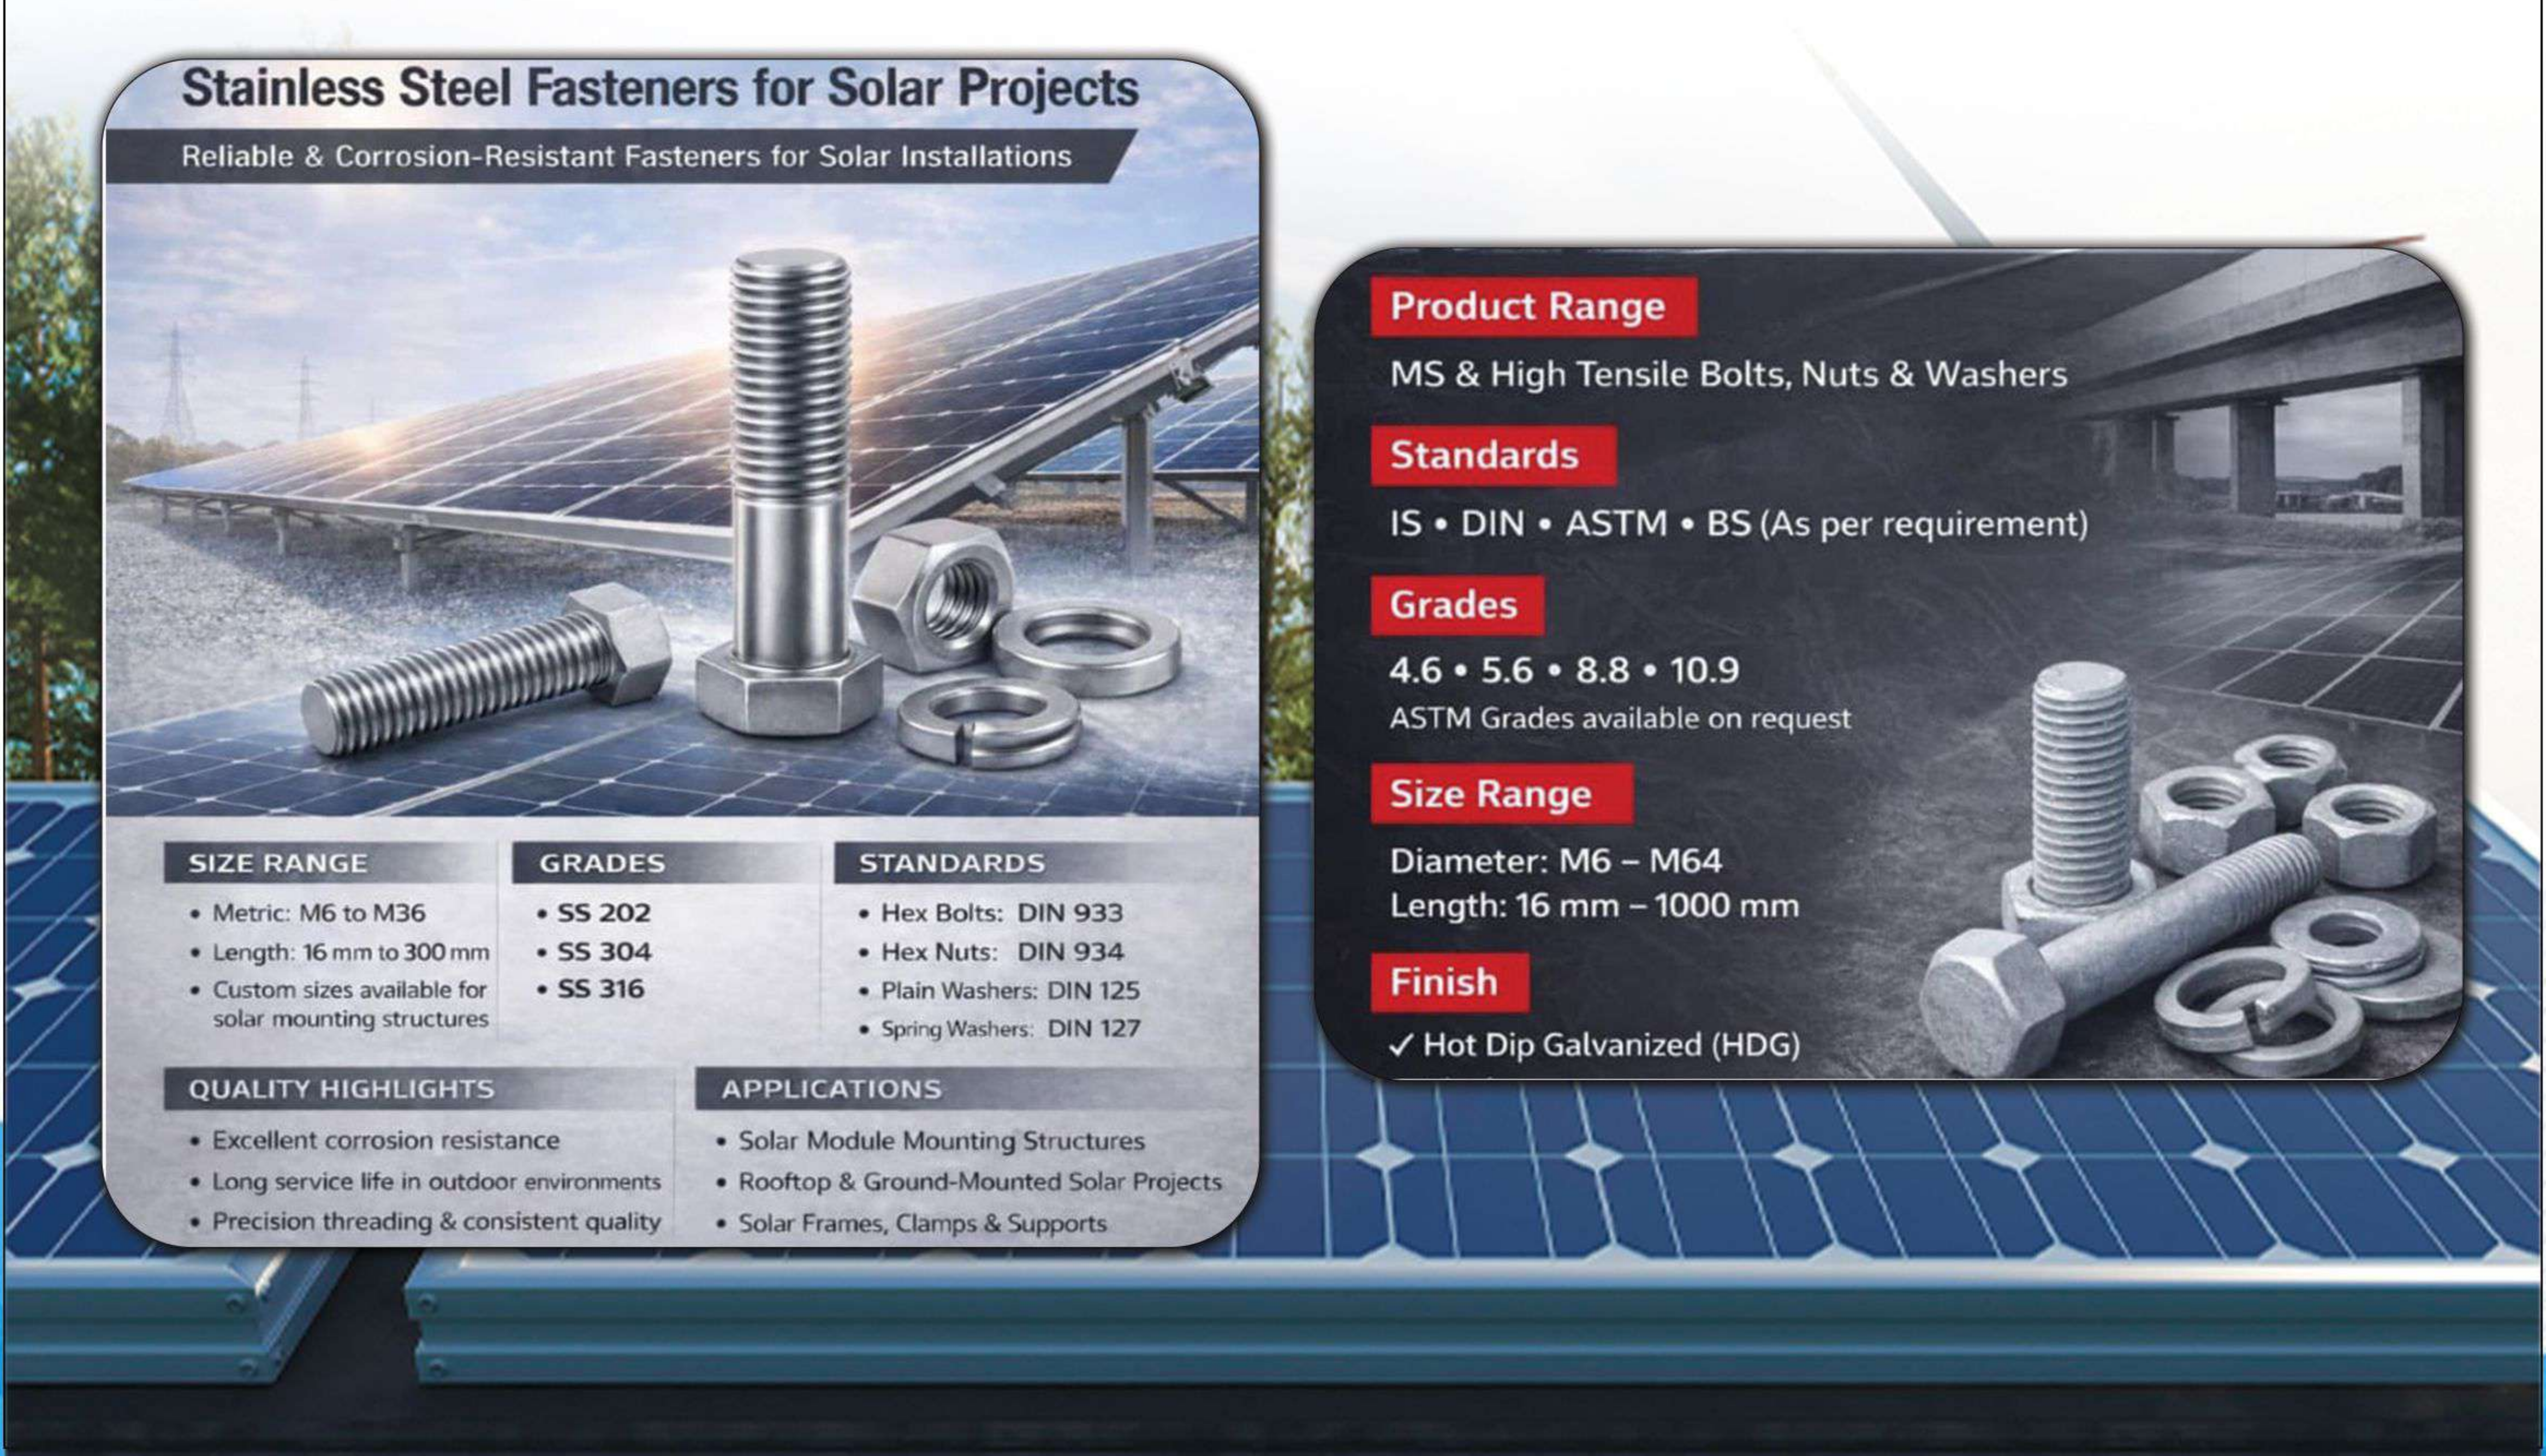

4.6 • 5.6 • 8.8 • 10.9
ASTM Grades available on request

Size Range

Diameter: M6 – M64
Length: 16 mm – 1000 mm

Finish

✓ Hot Dip Galvanized (HDG)

Solar Panels

Our Brands

Solar Panels (540wp to 620wp) with Bifacial & Topcon Series
@30 Year Warranty

Our Happy Customers:

300+ Customers Satisfaction

1. Srinivas Kovvur

We installed a solar roof for our office building, and the results are excellent. Our monthly electricity bills have reduced significantly, and power supply is much more stable now. The installation was smooth and professional. A smart investment for any office looking to cut costs.

2. Y. Dhanalakshmi, Kakinada (Avani Apartments)

I decided to install solar roofing for my home, and I'm extremely happy with the outcome. My electricity bills have dropped noticeably, leading to real monthly savings. It feels good to use clean energy while reducing expenses. Highly satisfied with the decision.

3. RamaThota Ramana Rao, kovvuru

Getting a solar roof installed at our home was one of the best decisions we made. Our power bills have come down drastically, and we feel good about using renewable energy. The system works perfectly, and the team explained everything clearly.

4. D.Veeraju.Gorripudi

We installed a solar roof for our home to manage rising electricity costs. The reduction in power bills has been impressive, and it has improved our overall operational efficiency. Reliable installation and great long-term benefits.

5. Akula Ratna Kumari, Amalapuram

The solar roof installation for our individual home connection has exceeded expectations. Electricity costs are much lower now, and the return on investment is clearly visible. Excellent service, timely execution, and noticeable savings from the very first month.

PM Surya Ghar

PM Surya Ghar: Muft Bijli Yojana

Benefits

Subsidy for Residential Households

Rs.30,000 per kW

Rs.78,000

Total subsidy to systems larger than 3 kW (capped)

For special states, an additional 10% subsidy will be applicable per kW

Subsidy for GHS / RWA

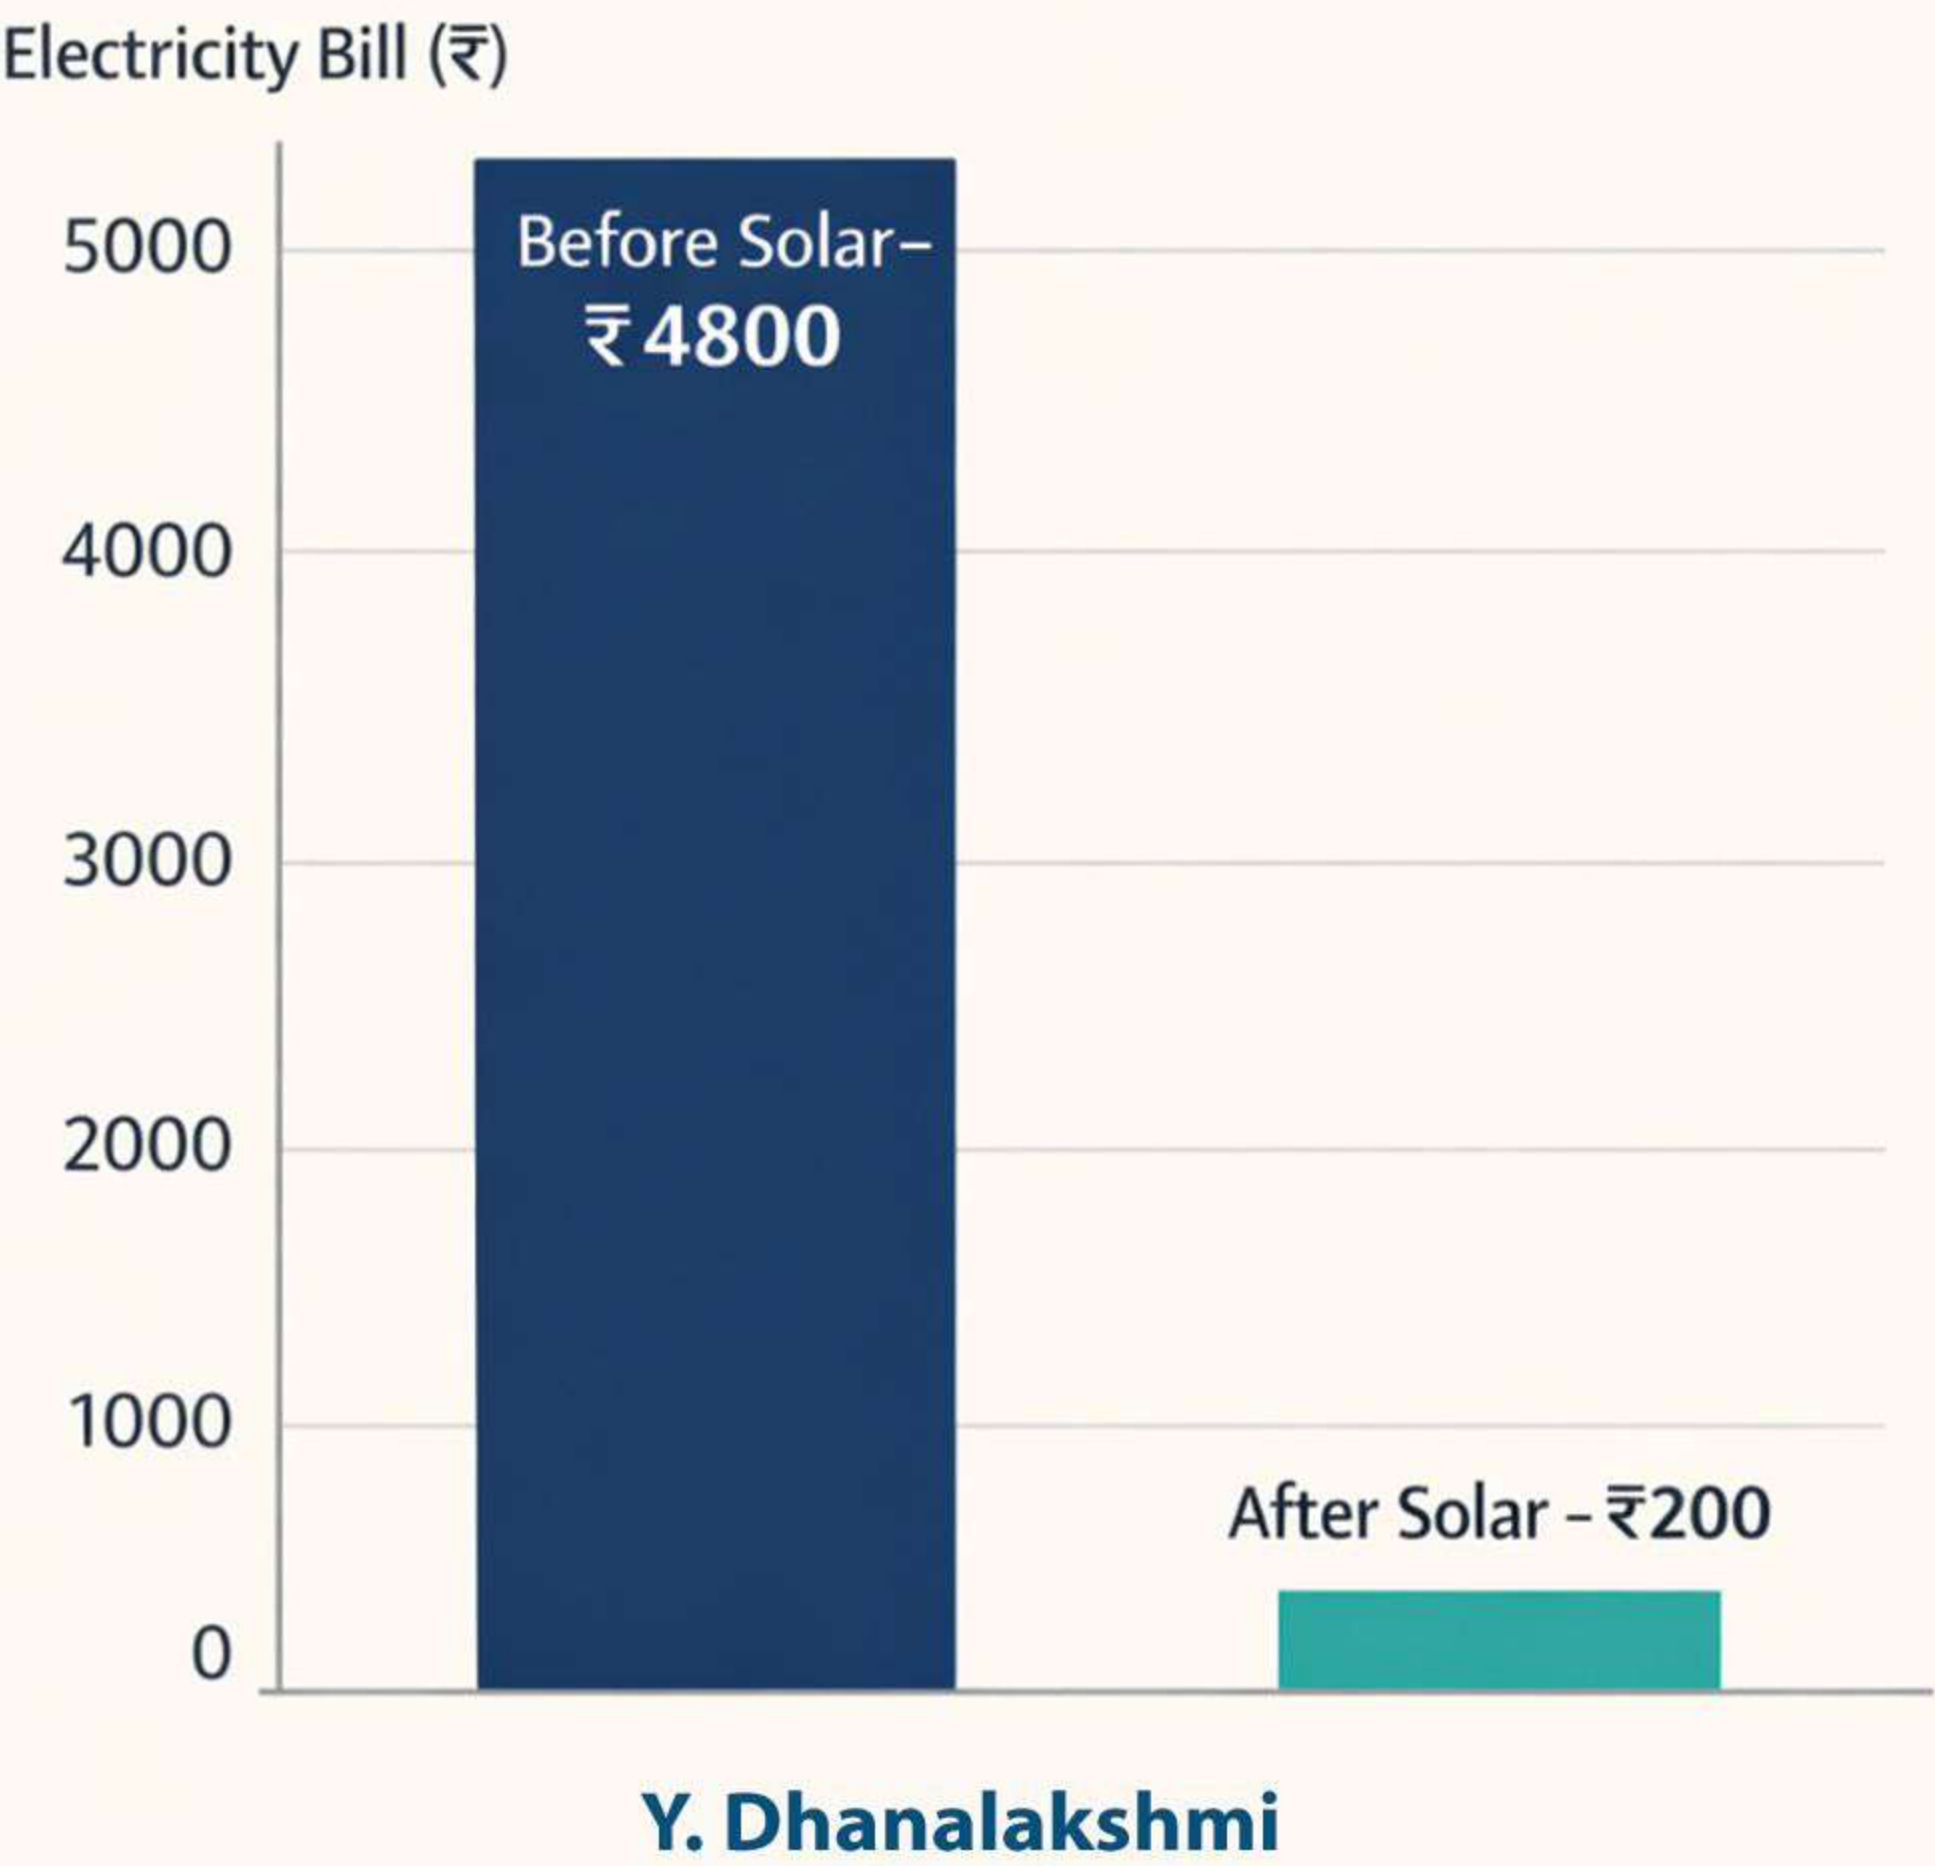

Rs. 18,000 per kW

For common facilities, including EV charging, up to 500 kW capacity (@1 kW per house) with the upper limit being inclusive of individual rooftop plants installed by individual residents in the GHS / RWA

Suitable Rooftop Solar Plant Capacity for Households

Average Monthly Electricity Consumption	Suitable Rooftop Solar Capacity
0–150	1–2 kW
150–300	2–3 kW
>300	Above 3 kW

Before Solar vs After Solar in Andhra Pradesh

Financial Feasibility

5 kW solar system in Kakinada
Payback period: 5 years
Lifetime savings: ₹8–9 lakhs

Industrial Solar Payback Period in ROI

Annual Savings for Common Industrial Solar Sizes

Solar Capacity	Avg. Cost (2025)	Annual Generation	Annual Savings	Payback
50 kW	₹20–22 lakh	70,000 units	₹7–9 lakh	3–3.5 yrs
100 kW	₹40–43 lakh	1.4 lakh units	₹12–14 lakh	3 yrs
250 kW	₹95–105 lakh	3.5 lakh units	₹28–35 lakh	3–3.4 yrs
500 kW	₹1.8–2 crore	7 lakh units	₹55–70 lakh	3–3.5 yrs
1 MW	₹3.5–4 crore	14 lakh units	₹1.1–1.4 crore	3–3.3 yrs

Long-Term Financial Benefits

Let us assume **Payback Calculation**

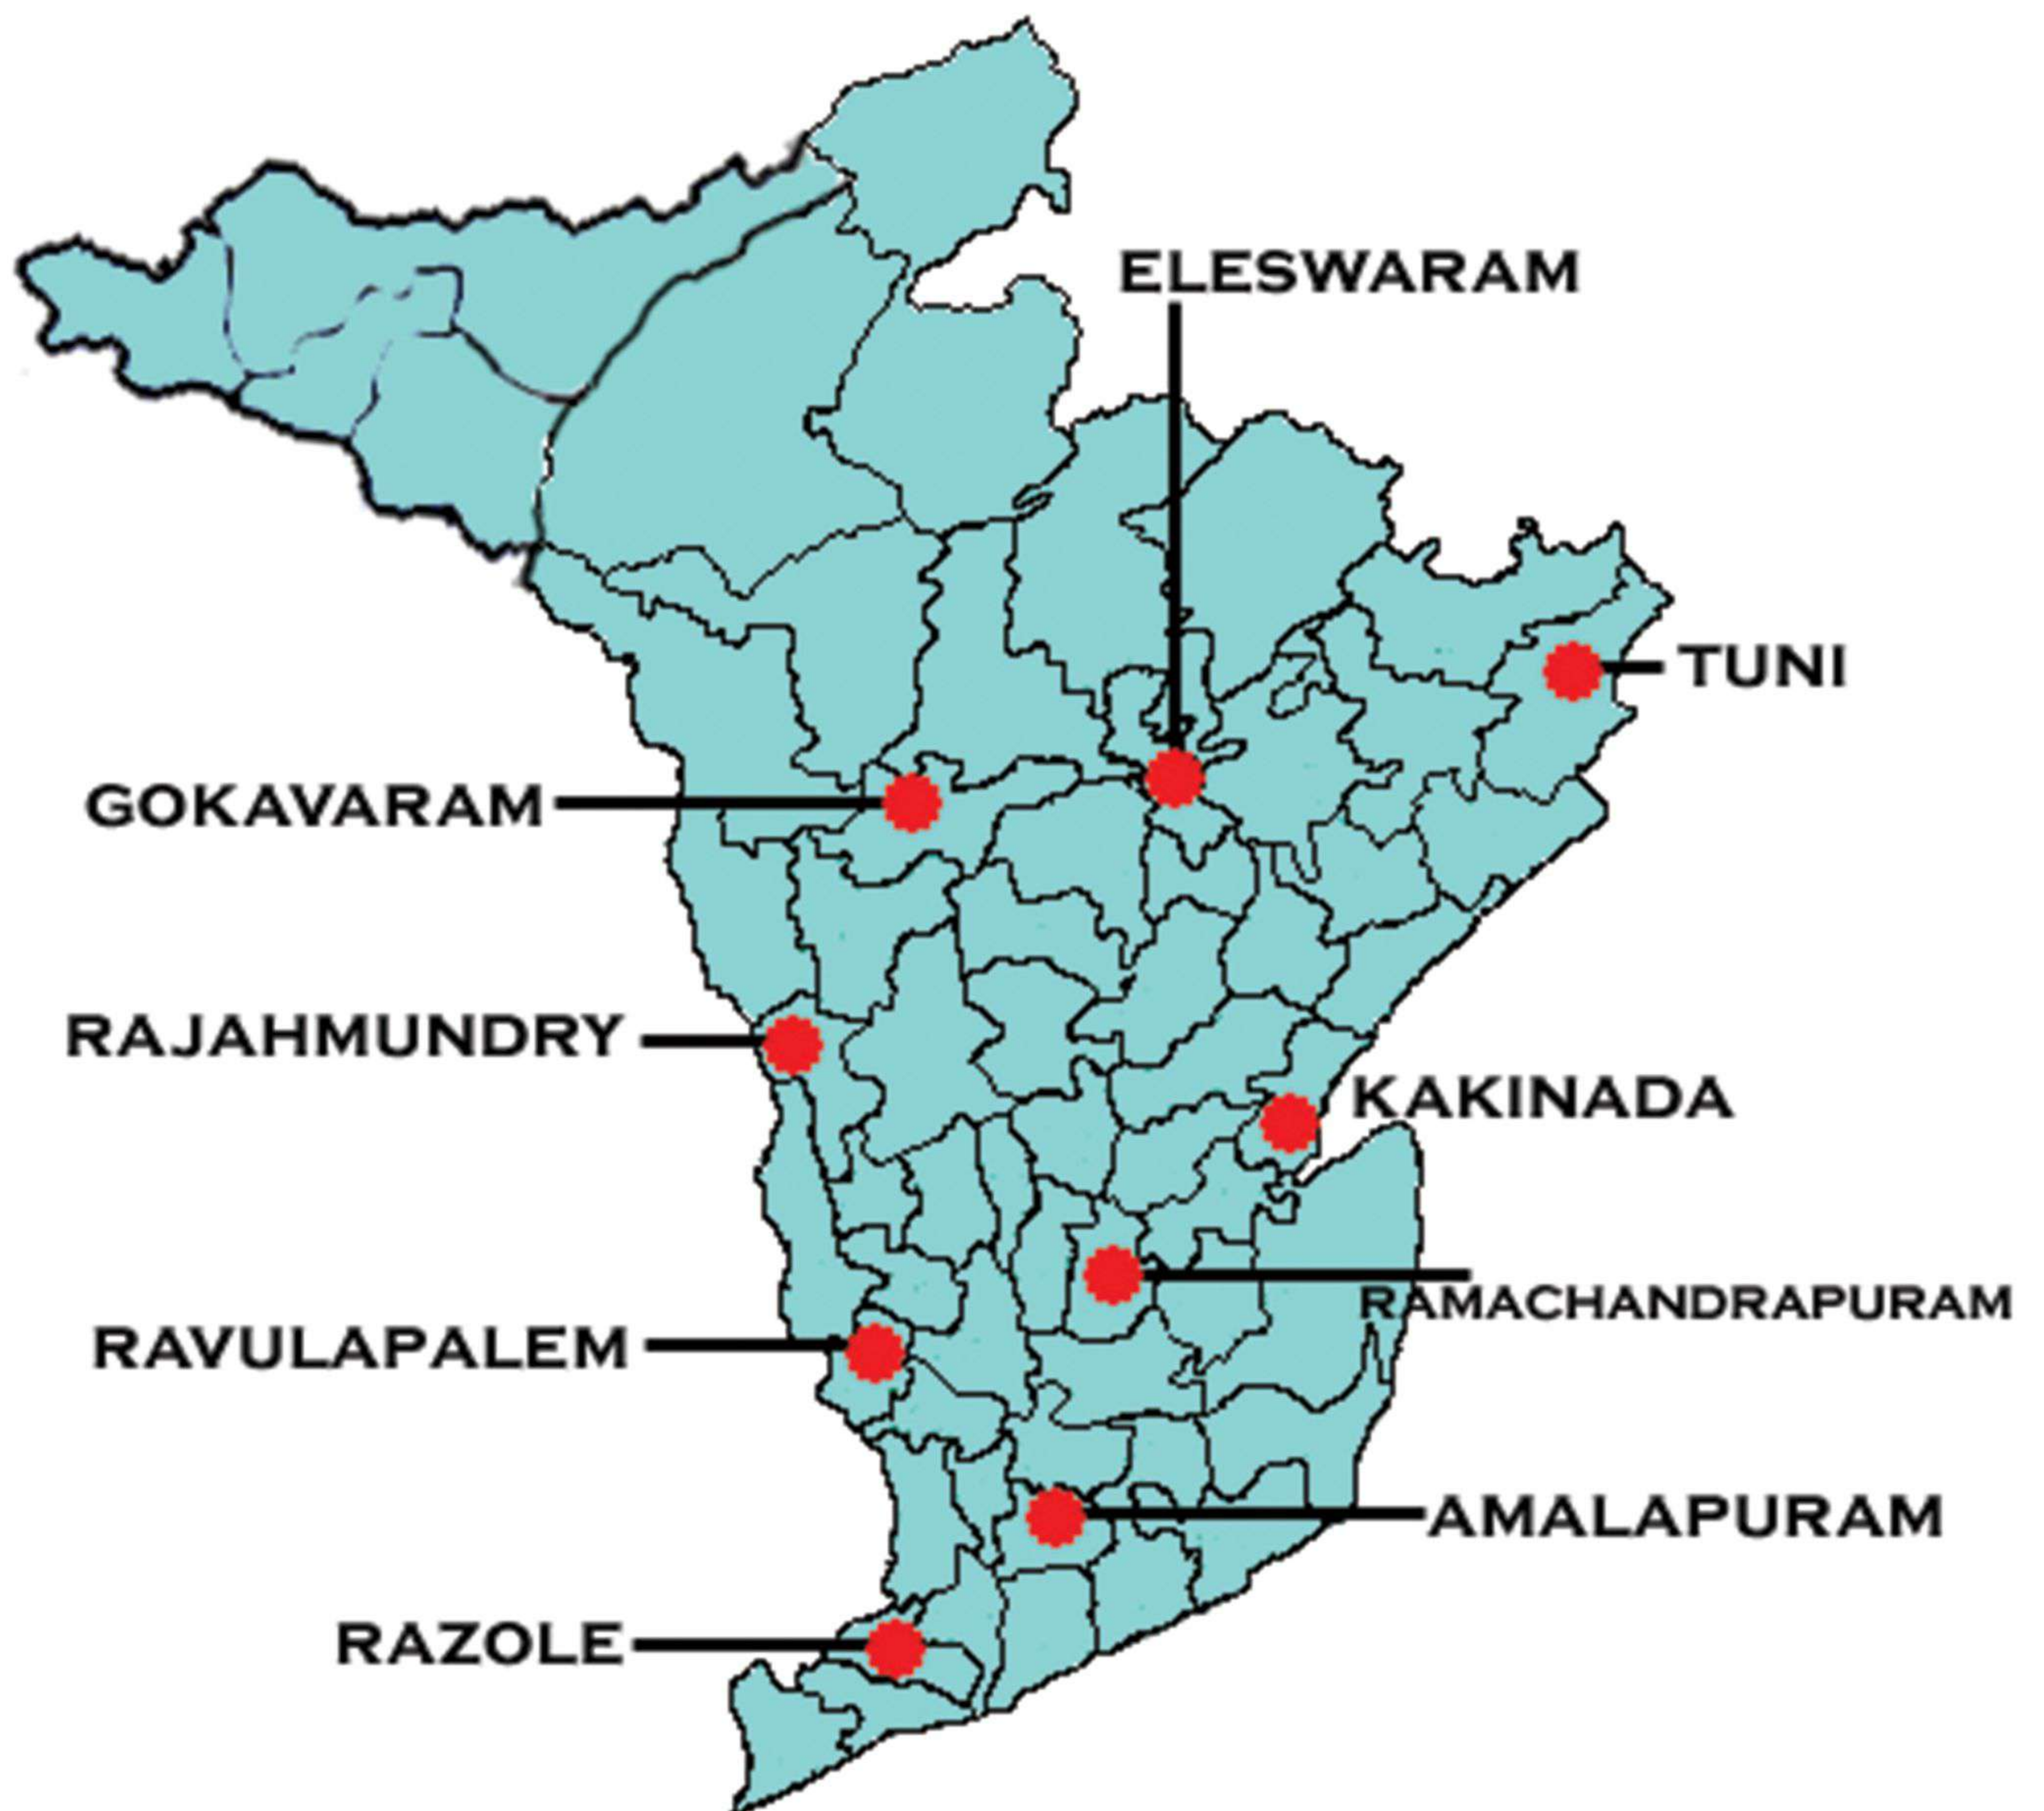

Once the payback is completed, **solar becomes a pure profit machine.**

★ **Benefits After Payback**

- Electricity cost reduces by **80–90%**
- Plant life: **25 years**
- O&M cost: **Very low (1–1.5% per year)**
- Energy independence
- Shields against tariff hikes
- Enhances ESG rating
